

Change the terminal name in each container with the appropriate container name and SRN and name.

If the terminal name is not changed, your lab will not be evaluated **AKA zero**.

export PS1="seed-attacker:PES1UG20CSXXX:Name:\w\n\\${>}"

The screenshot shows a terminal window with a dark background. The title bar at the top reads "seed@VM: ~/.../lab 3" on the left and "seed@VM: ~/.../" on the right, separated by a close button icon. The terminal content shows the following sequence of commands and prompts:

```
seed-attacker:PES2UG19CSXXX:/
$>export PS1="seed-attacker:PES2UG19CSXXX:\w\n\${>}"
seed-attacker:PES2UG19CSXXX:/
$>
```
